ACKNOWLEDGMENTS

Appreciation is expressed to the following people:

J. Carlyle Parker, Archivist at California State University Stanislaus, for his sound advise on this project.

Don Sanford, fellow member of the Stanislaus County Genealogical Society, for the excellent cover design.

Richard Belt, member of the Stanislaus County Historical Society, who provided the 1876-1976 map of the county.

Karen Mathews, County Clerk-Recorder, and the employees of the Elections-Voter Registration office who arranged for a pleasant place to work, and were always courteous and helpful.

Cecil Kilroy and Don Locke, for their patience and understanding.

INTRODUCTION

According to John L. Andriot in his *Population Abstract of the United States (McLean, VA 1983)*, there were fifty-eight counties in the State of California in the year 1890. The population of the entire state was set at 1,213,298, with Stanislaus County accounting for 10,040 of that number.

Family history researchers have been at a loss to find records in the United States between the years of 1880 and 1900 due to the loss of the 1890 Federal Census schedules which were all destroyed or badly damaged by fire. A few years ago, the 1890 Great Registers of California were typed from the original manuscript ledgers, and microfilmed. These are available at the California State Library. However, it has been found that there are many errors in the transcriptions and a few missing pages.

Early in 1990, The California State Genealogical Alliance embarked on an ambitious project of abstracting key data from the 1890 Great Registers of all the counties in California, thus creating a new finding aid for genealogists. Volunteers were called for, and this truly state-wide project got under way in 1991. Eventually this data from all counties will be published in book form or microfiche.

Mileta Kilroy and Bette Locke, members of the Stanislaus County Genealogical Society used the original manuscript Register which is housed in the County Clerk-Recorder's office at 912 11th Street in Modesto, California. The manuscript Register was compared with the printed, microfilmed copy and many errors were corrected. In all cases, the dates and spelling in the manuscript copy (primary source) were used rather than the typed version (secondary source). The data sent to the State Alliance contains only the name, age, birthplace, residence and date of voter registration. In this separate compilation of Stanislaus County, all information found on the original Register has been included. Occupations have been recorded, and where there is a naturalization, the date and place is noted. In the case of a cancellation, the date, place and reason has been cited. Often the cancellation gives the place where a person moved, and sometimes lists his death.

Some of the names were very difficult to read---some spellings varied. When there was a question of which was correct, both spellings were entered. In the microfilmed copy, there are 3,458 entries; in this transcription, there are 3,876 entries. Every effort has been made to make this list as accurate as possible. However, if any question arises in the reader's mind, the manuscript Register should be examined.

Mileta Farr Kilroy
Bette Perry Locke
1 December 1992

EXPLANATIONS

1. The page number refers to the page number on the printed, microfilmed copy. This microfilm can be ordered from the California State Library in Sacramento, California.
2. The letter "M" followed by "1" (M1) signifies a discrepancy between the printed copy and the original manuscript ledger.
3. Some places of residence were different on the manuscript copy and the printed copy. Both places of residence are included in this compilation.
4. The "Cancellation of Registration" indicates that a man either moved from the county, he died, or the registration was cancelled for other stated reasons.
5. "P42" designates a name that was on the OMISSIONS list in the printed version. This page of omissions contains thirty-four names.
6. The map of Stanislaus County, 1776-1976, was first published in 1976 as a part of the U. S. Centennial. Following is the information printed on the original map.
